

Lightpaper

Q1-Q2 2021

Orbit is the first project that include audio NFT marketplace and launcher platform. Based on Binance smart chain our trading platform provides unprecedented benefits for all market participants. Our main task was to create a platform where small authors and young NFT projects could gain fame and buyers who would appreciate their work according to their worth. As a reward for investors on the plot, we will issue unique orbit NFT cards to the most active market participants. Our team is working hard to make the purchase and sale of NFT as convenient as possible in the history

Orbit launcher

A huge number of new projects appear every day and it is very difficult to choose something with great potential. NFT has gained a lot of popularity recently, which is why many great projects are not visible to the public. The Orbit launcher will search for Diamond in the rough. Our team will fully support the selected projects for their successful launch. Orbit investors will have priority and will be able to invest in successful projects at the earliest stages. As a pass to the presale of new projects you can use a Orbit token(ORT) based on the Binance Smart Chain or Orbit NFT cards. These cards can be obtained in sets or simply by having a lot of deals on our marketplace. In the end, all and all market participants benefit from cooperation with ORBITS . We get a Win-win situation

We think big and that's why we want to encourage the first holders. Trading on the orbit marketplace, you can get unique bonuses by using special Orbit NFT that will be issued during the presale and that you can get in sets. For example, presale NFT cards give the opportunity to get a percentage of the total sales on the market in Orbit tokens

Orbit NFT

To support the people who trade on our platform, we have created our own unique NFT cards. There are two ways to get an NFT.

- 1) If your sales volume is above \$ 1,000 per month.
- 2) By participating in NFT events and receiving a special card from the pack.

Investors who will collect 5 or more unique Orbit NFT will have the opportunity to participate in private sales of launcher projects. Another unique opportunity that opens up to Orbit NFT holders is the exchange of NFT for our token.

QUARTER 1 and 2, 2021
